MP02 XX 280 Series

Dual Diode Modules

Replaces December 1998 version, DS5103-3.0

DS5103-4.0 January 2000

FEATURES

- Dual Device Module
- Electrically Isolated Package
- Pressure Contact Construction
- International Standard Footprint
- Alumina (non-toxic) Isolation Medium

APPLICATIONS

- Rectifier Bridges
- DC Power Supplies
- Plating Rectifiers
- Traction Systems

KEY PARAMETERS

V_{RRM}	2000V
I_{FSM}	6000A
$I_{F(AV)}$(per arm)	280A
V_{isol}	2500V

CIRCUIT OPTIONS

Code	Circuit
HB	G	GN	
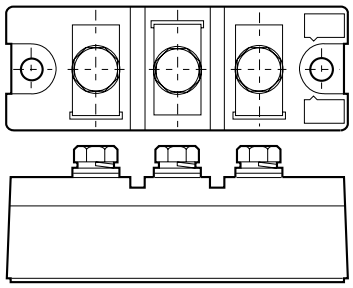
VOLTAGE RATINGS

Type Number	Repetitive Peak Voltages V_{RRM}	Conditions
MP02/280 - 20	2000	T_{vj} = 150°C
MP02/280 - 18	1800	I_{RM} = 30mA
MP02/280 - 16	1600	$V_{RSM} = V_{RRM} + 100V$
MP02/280 - 14	1400	

Lower voltage grades available. For full description of part number see "Ordering Instructions" on page 3.

PACKAGE OUTLINE



Module outline type code: MP02.
See Package Details for further information.

CURRENT RATINGS - PER ARM

Symbol	Parameter	Conditions		Max.	Units
$I_{F(AV)}$	Mean forward current	Halfwave, resistive load	T_{case} = 75°C	280	A
			T_{case} = 85°C	252	A
			$T_{heatsink}$ = 75°C	228	A
			$T_{heatsink}$ = 85°C	204	A
$I_{F(RMS)}$	RMS value	T_{case} = 75°C		440	A

SURGE RATINGS - PER ARM

Symbol	Parameter	Conditions		Max.	Units
I_{FSM}	Surge (non-repetitive) on-state current	10ms half sine; T_j = 150°C	V_R = 0	6000	A
			V_R = 50% V_{RRM}	4800	A
I^2t	I^2t for fusing	10ms half sine; T_j = 150°C	V_R = 0	180000	A^2s
			V_R = 50% V_{RRM}	115000	A^2s

THERMAL & MECHANICAL RATINGS

Symbol	Parameter	Conditions	Max.	Units
$R_{th(j-c)}$	Thermal resistance - junction to case per Diode	dc	0.21	°C/W
		halfwave	0.22	°C/W
		3 phase	0.23	°C/W
$R_{th(c-hs)}$	Thermal resistance - case to heatsink per Diode	Mounting torque = 6Nm with mounting compound	0.07	°C/W
T_{vj}	Virtual junction temperature		150	°C
T_{sto}	Storage temperature range		-40 to 150	°C
V_{isol}	Isolation voltage	Commoned terminals to base plate AC RMS, 1min, 50Hz	2.5	kV

CHARACTERISTICS

Symbol	Parameter	Conditions	Max.	Units
V_{FM}	Forward voltage	At 400A, T_{case} = 25°C	1.1	V
I_{RM}	Peak reverse current	At V_{RRM}, T_j = 150°C	30	mA
V_{TO}	Threshold voltage	At T_{vj} = 150°C	0.80	V
r_T	On-state slope resistance	At T_{vj} = 150°C	0.6	mΩ

ORDERING INSTRUCTIONS

Part number is made up of as follows:

MP02 HB 280 - 18

MP = Pressure contact module
02 = Outline type
HB = Circuit configuration code (see "circuit options" - front page)
280 = Nominal average current rating at T_{case} = 75°C
18 = V_{RRM}/100

Examples:

MP02HB280 - 16
MP02G280 - 20
MP02GN280 - 18

Note: Prefered type is HB configuration. G and GN types are available for specific applications, only when requested.

MOUNTING RECOMMENDATIONS

- Adequate heatsinking is required to maintain the base temperature at 75°C if full rated current is to be achieved. Power dissipation may be calculated by use of $V_{(TO)}$ and r_T information in accordance with standard formulae. We can provide assistance with calculations or choice of heatsink if required.

- The heatsink surface must be smooth and flat; a surface finish of N6 (32µmin) and a flatness within 0.05mm (0.002") are recommended.

- Immediately prior to mounting, the heatsink surface should be lightly scrubbed with fine emery, Scotch Brite or a mild chemical etchant and then cleaned with a solvent to remove oxide build up and foreign material. Care should be taken to ensure no foreign particles remain.

- An even coating of thermal compound (eg. Unial) should be applied to both the heatsink and module mounting surfaces. This should ideally be 0.05mm (0.002") per surface to ensure optimum thermal performance.

- After application of thermal compound, place the module squarely over the mounting holes, (or 'T' slots) in the heatsink. Using a torque wrench, slowly tighten the recommended fixing bolts at each end, rotating each in turn no more than 1/4 of a revolution at a time. Continue until the required torque of 6Nm (55lb.ins) is reached at both ends.

- It is not acceptable to fully tighten one fixing bolt before starting to tighten the others. Such action may DAMAGE the module.

CURVES

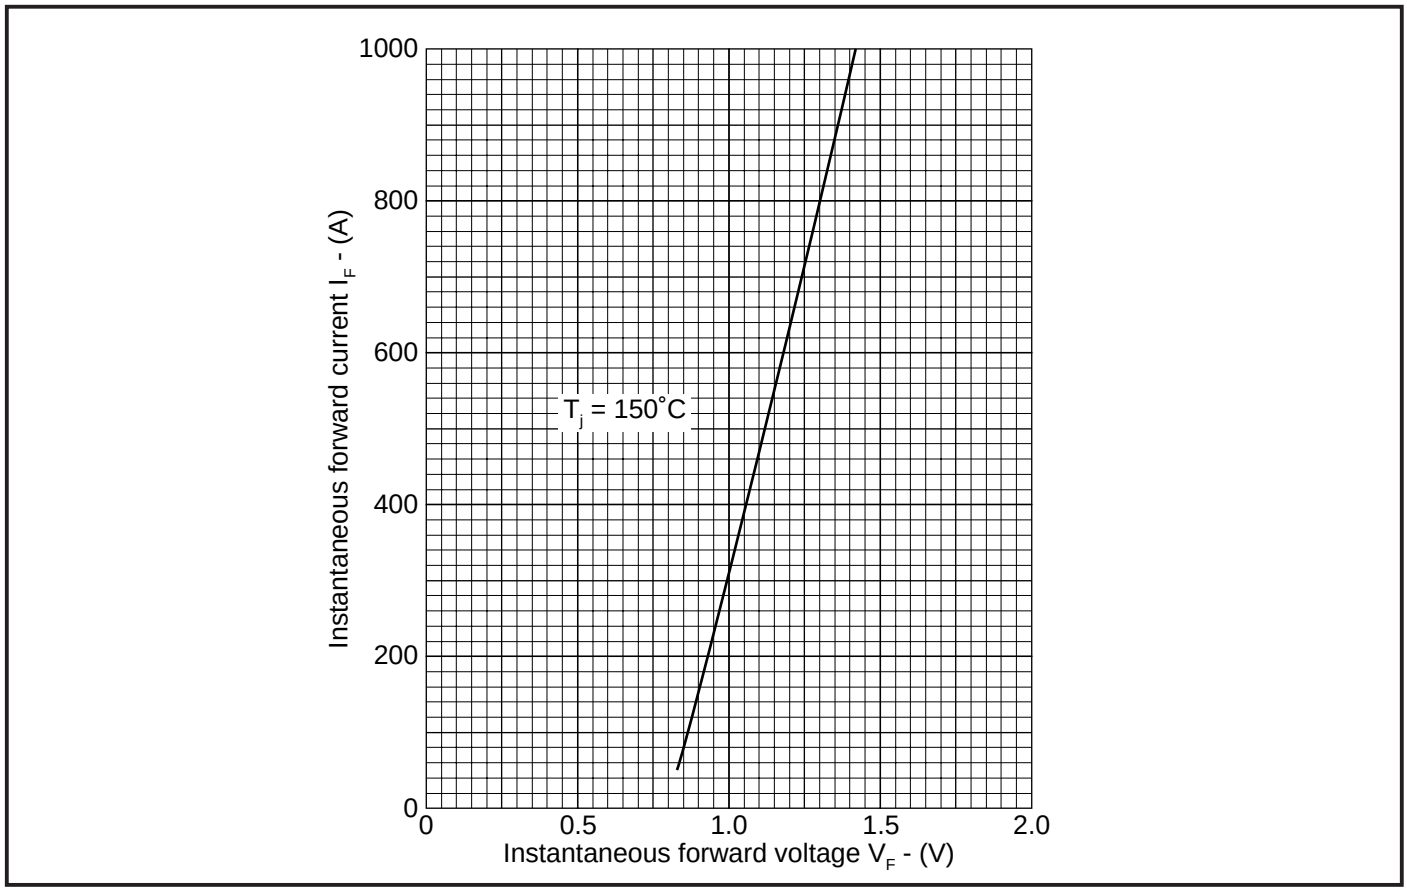


Fig. 1 Maximum (limit) forward characteristics (Per diode)

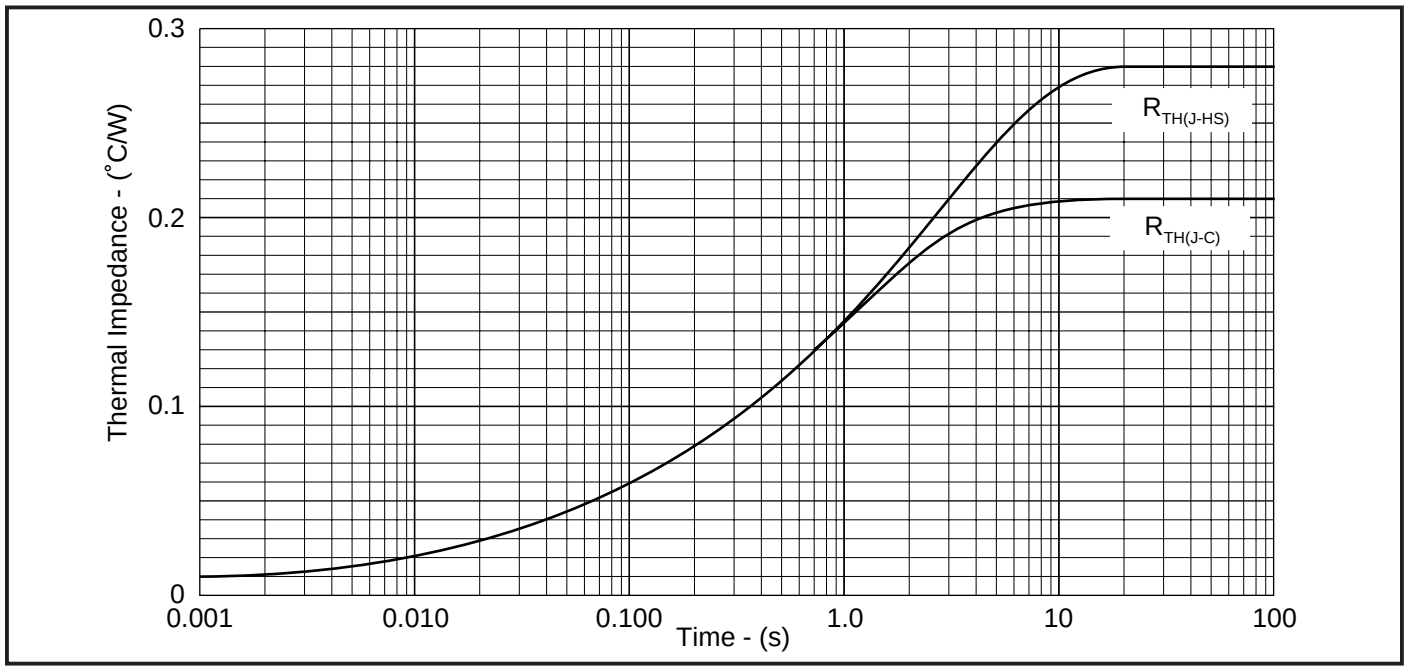

Fig. 2 Transient thermal impedance (DC) - (Per diode)

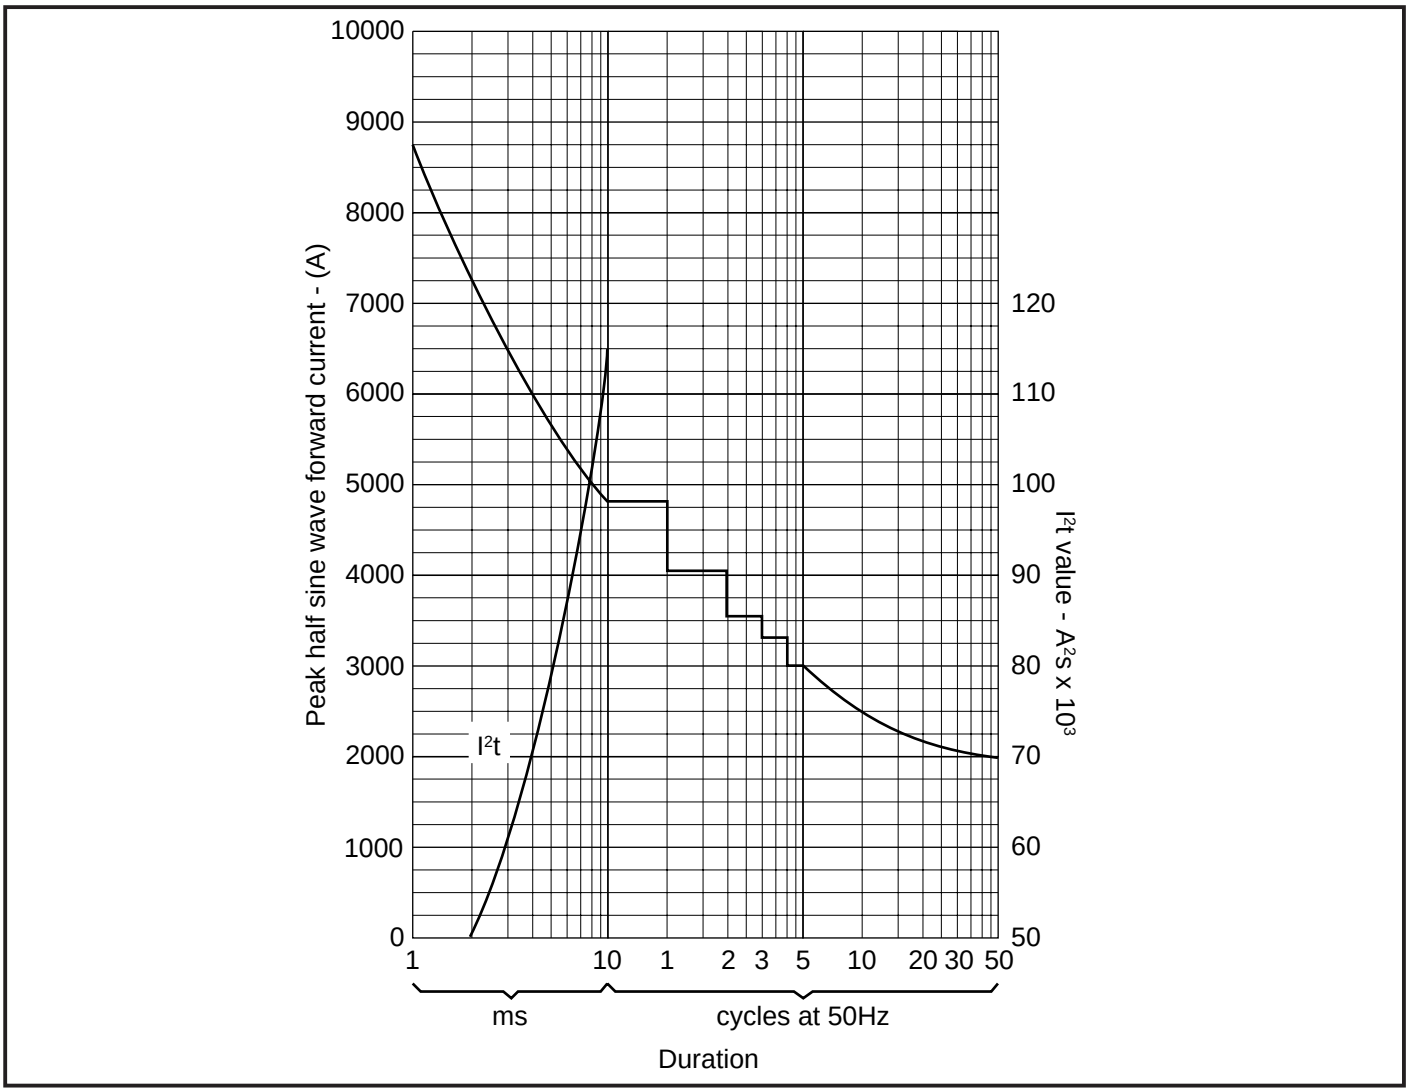

Fig. 3 Surge (non-repetitive) forward current vs time (with 0% V_{RRM}, T_{case} = 150˚C)

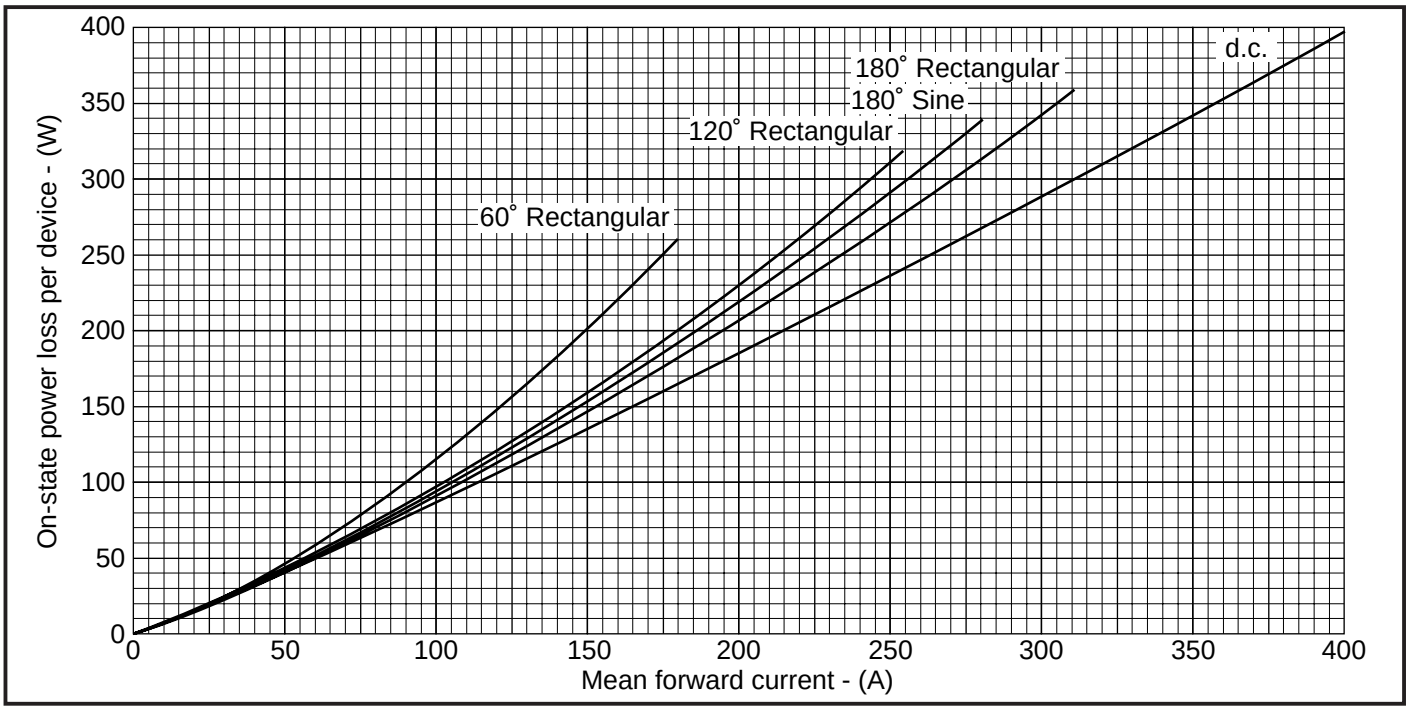

Fig. 4 On-state power loss per arm vs forward current at various conduction angles, 50/60Hz

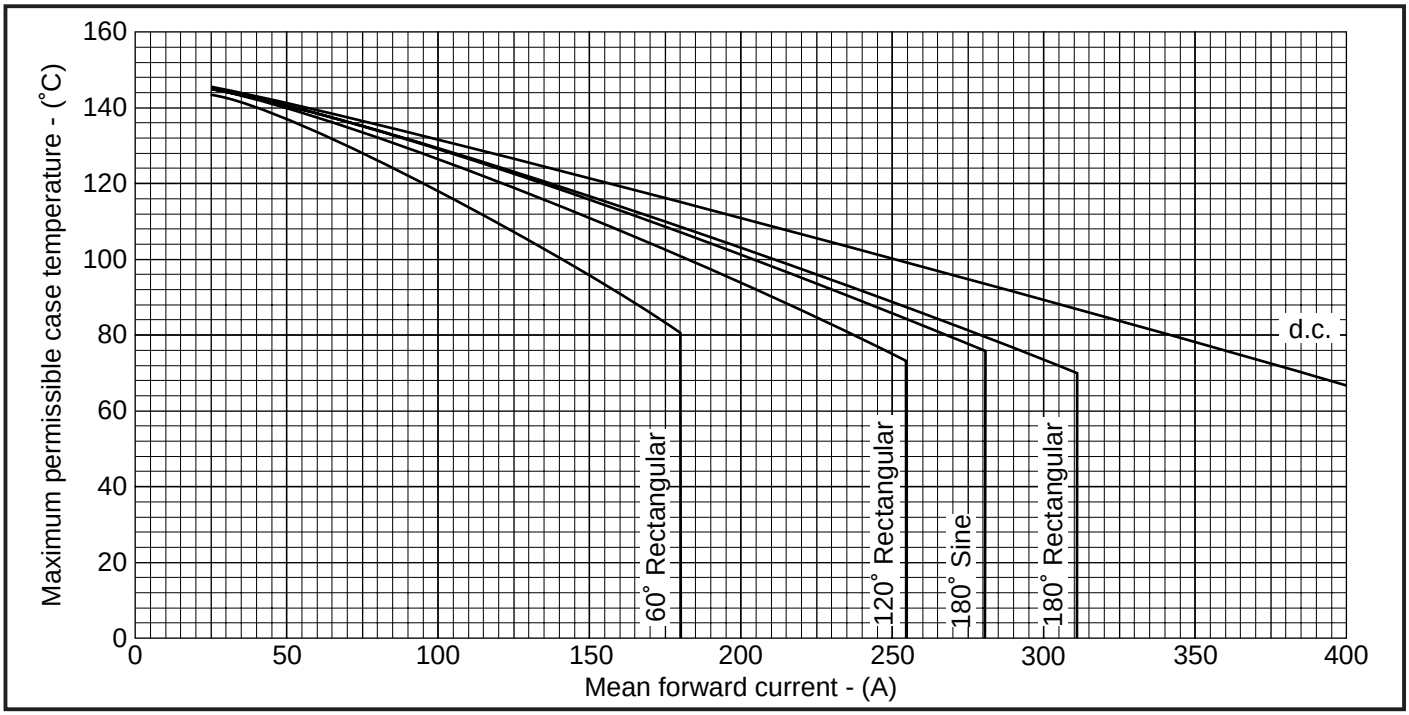

Fig. 5 Maximum permissible case temperature vs forward current per arm at various conduction angles, 50/60Hz

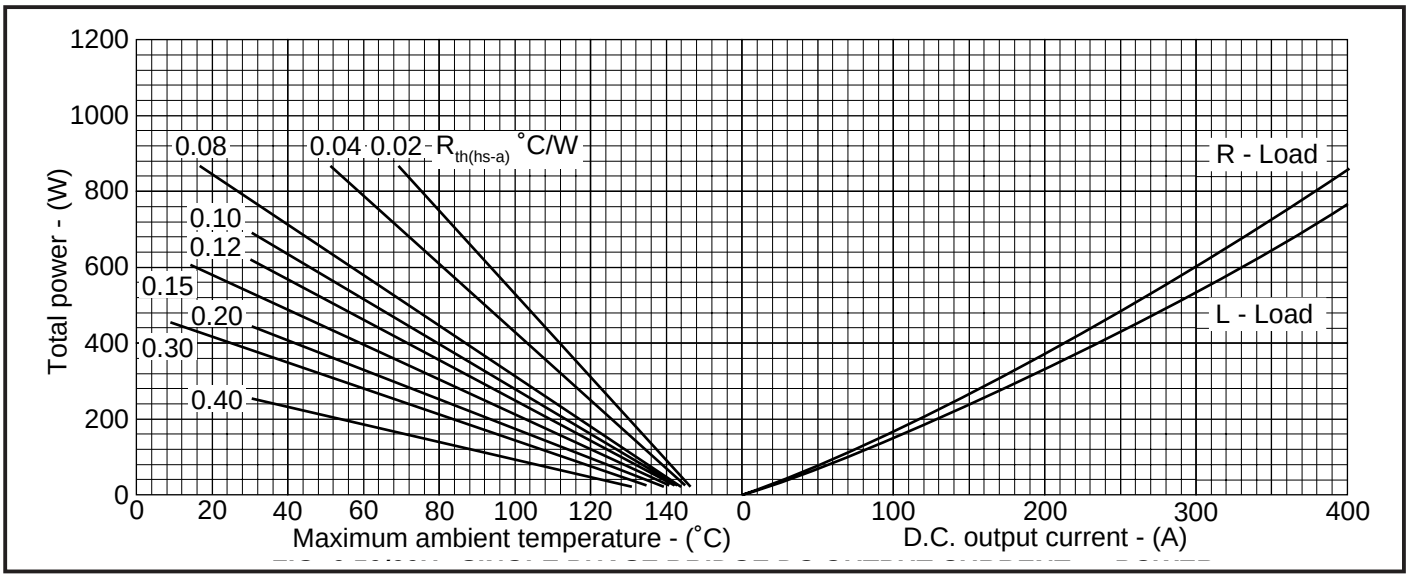

Fig. 6 50/60Hz single phase bridge dc output current vs power loss and maximum permissible ambient temperature for various values of heatsink thermal resistance.

(Note: $R_{th(hs-a)}$ values given above are true heatsink thermal resistances to ambient and already account for $R_{th(c-hs)}$ module contact thermal).

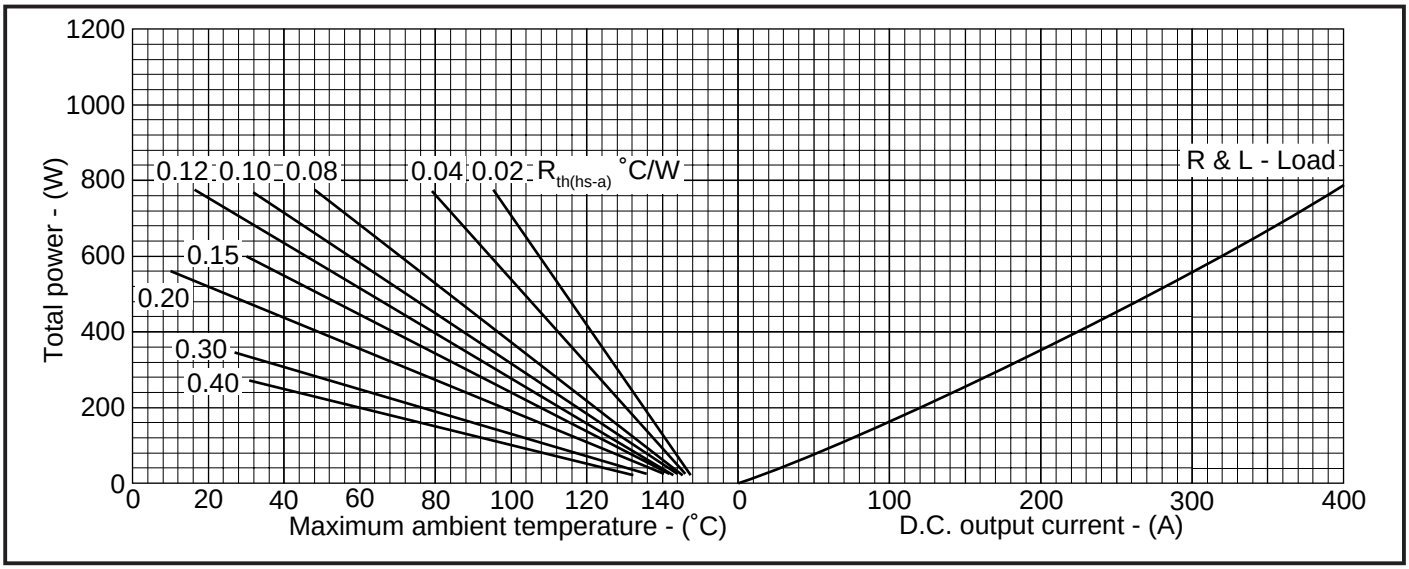

Fig. 7 50/60Hz 3- phase bridge dc output current vs power loss and maximum permissible ambient temperature for various values of heatsink thermal resistance.

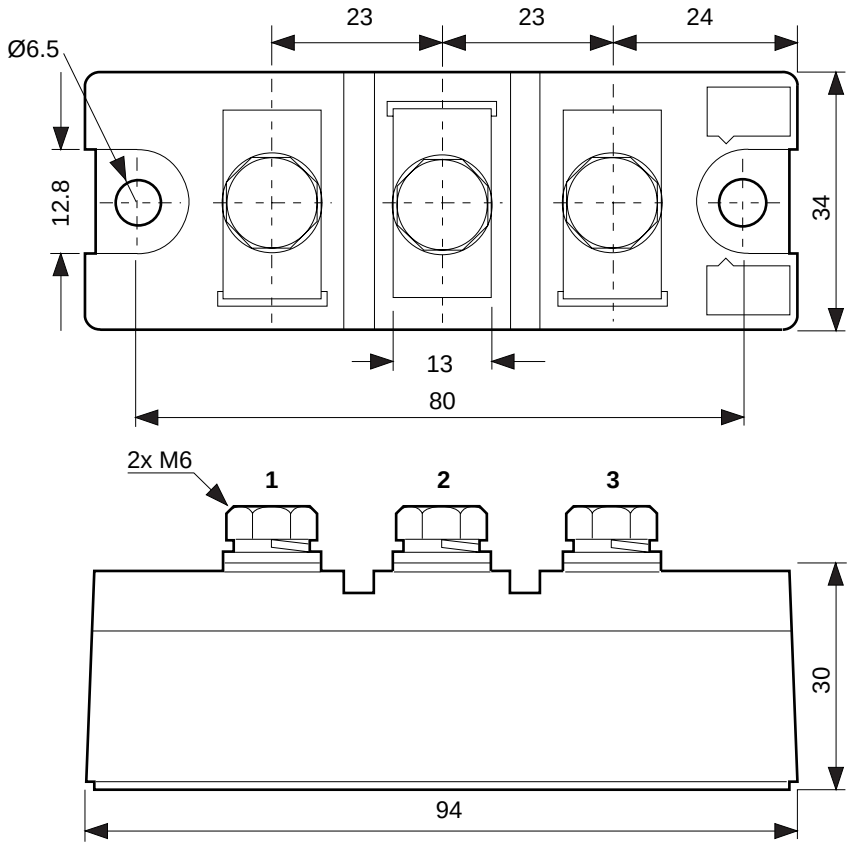
(Note: $R_{th(hs-a)}$ values given above are true heatsink thermal resistances to ambient and already account for $R_{th(c-hs)}$ module contact thermal).

MP02 XX 280 Series

PACKAGE DETAILS

For further package information, please contact your local Customer Service Centre. All dimensions in mm, unless stated otherwise. DO NOT SCALE.



Nominal weight: 350g
Recommended fixings for mounting: M6 socket head cap screws
Recommended mounting torque: 6Nm (55lb.ins)
Recommended torque for electrical connections: 5Nm (44lb.ins)
Maximum torque for electrical connections: 8Nm (70lb.ins)

Module outline type code: MP02

Datasheet Annotations:

Dynex Semiconductor annotate datasheets in the top right hard corner of the front page, to indicate product status. The annotations are as follows:-

Target Information: This is the most tentative form of information and represents a very preliminary specification. No actual design work on the product has been started.

Preliminary Information: The product is in design and development. The datasheet represents the product as it is understood but details may change.

Advance Information: The product design is complete and final characterisation for volume production is well in hand.

No Annotation: The product parameters are fixed and the product is available to datasheet specification.
