

RF LDMOS Wideband Integrated Power Amplifier

The MD8IC970N wideband integrated circuit is designed with on-chip prematching that makes it usable from 136 to 940 MHz. This multi-stage structure is rated for 26 to 32 Volt operation and covers all typical base station modulation formats. This device has a 2-stage design with off-chip matching for the input, interstage and output networks to cover the desired frequency sub-band.

- Typical Two-Tone Performance: $V_{DD1} = 28$ Volts, $V_{DD2} = 25$ Volts, $I_{DQ1(A+B)} = 60$ mA, $I_{DQ2(A+B)} = 550$ mA, $P_{out} = 35$ Watts Avg.

Frequency	G _{ps} (dB)	PAE (%)	IMD (dBc)
850 MHz	30.6	40.1	-30.5
900 MHz	31.9	42.4	-31.0
940 MHz	32.6	42.1	-31.3

- Capable of Handling 10:1 VSWR, @ 32 Vdc, 940 MHz, 137 Watts CW Output Power (3 dB Input Overdrive from Rated P_{out}), Designed for Enhanced Ruggedness
- Typical P_{out} @ 1 dB Compression Point ≈ 79 Watts CW

Features

- Characterized with Series Equivalent Large-Signal Impedance Parameters and Common Source S-Parameters
- On-Chip Prematching. On-Chip Stabilization.
- Integrated Quiescent Current Temperature Compensation with Enable/Disable Function (1)
- Integrated ESD Protection
- 225°C Capable Plastic Package
- RoHS Compliant
- In Tape and Reel. R1 Suffix = 500 Units, 44 mm Tape Width, 13 inch Reel.

Information in this document is provided solely to enable system and software implementers to use Freescale Semiconductor products. There are no express or implied copyright licenses granted hereunder to design or fabricate any integrated circuits or integrated circuits based on the information in this document.

Freescale Semiconductor reserves the right to make changes without further notice to any products herein. Freescale Semiconductor makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does Freescale Semiconductor assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation consequential or incidental damages. "Typical" parameters that may be provided in Freescale Semiconductor data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals", must be validated for each customer application by customer's technical experts. Freescale Semiconductor does not convey any license under its patent rights nor the rights of others. Freescale Semiconductor products are not designed, intended, or authorized for use as components in systems intended for surgical implant into the body, or other applications intended to support or sustain life, or for any other application in which the failure of the Freescale Semiconductor product could create a situation where personal injury or death may occur. Should Buyer purchase or use Freescale Semiconductor products for any such unintended or unauthorized application, Buyer shall indemnify and hold Freescale Semiconductor and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that Freescale Semiconductor was negligent regarding the design or manufacture of the part.
