

WARP2 SERIES IGBT WITH  
ULTRAFAST SOFT RECOVERY DIODE

**Applications**

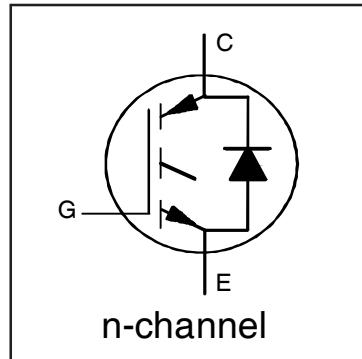

- Automotive HEV and EV
- PFC and ZVS SMPS Circuits

**Features**

- Low  $V_{CE(on)}$  NPT Technology, Positive Temperature Coefficient
- Lower Parasitic Capacitances
- Minimal Tail Current
- HEXFRED Ultra Fast Soft-Recovery Co-Pack Diode
- Tighter Distribution of Parameters
- Lead-Free, RoHS Compliant
- Automotive Qualified \*

**Benefits**

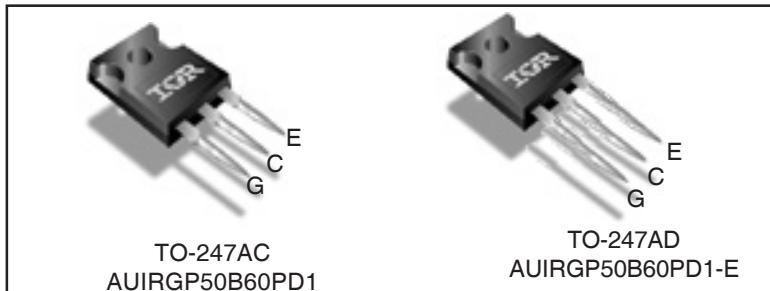

- Parallel Operation for Higher Current Applications
- Lower Conduction Losses and Switching Losses
- Higher Switching Frequency up to 150kHz

$V_{CES} = 600V$   
 $V_{CE(on)} \text{ typ.} = 2.00V$   
@  $V_{GE} = 15V$   $I_C = 33A$

**Absolute Maximum Ratings**

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only; and functional operation of the device at these or any other condition beyond those indicated in the specifications is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability. The thermal resistance and power dissipation ratings are measured under board mounted and still air conditions. Ambient temperature ( $T_A$ ) is 25°C, unless otherwise specified.

Notes:

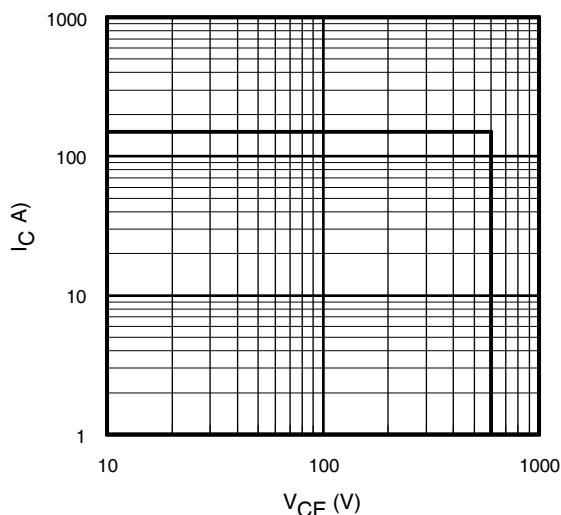

- ①  $R_{\text{CE}(\text{on})}$  typ. = equivalent on-resistance =  $V_{\text{CE}(\text{on})}$  typ./  $I_C$ , where  $V_{\text{CE}(\text{on})}$  typ.= 2.00V and  $I_C = 33\text{A}$ .  $I_D$  (FET Equivalent) is the equivalent MOSFET  $I_D$  rating @  $25^\circ\text{C}$  for applications up to 150kHz. These are provided for comparison purposes (only) with equivalent MOSFET solutions.
- ②  $V_{\text{CC}} = 80\%$  ( $V_{\text{CES}}$ ),  $V_{\text{GE}} = 15\text{V}$ ,  $L = 28\mu\text{H}$ ,  $R_G = 22\Omega$ .
- ③ Pulse width limited by max. junction temperature.
- ④ Energy losses include "tail" and diode reverse recovery, Data generated with use of Diode 30ETH06.
- ⑤  $C_{\text{oes eff.}}$  is a fixed capacitance that gives the same charging time as  $C_{\text{oes}}$  while  $V_{\text{CE}}$  is rising from 0 to 80%  $V_{\text{CES}}$ .  $C_{\text{oes eff. (ER)}}$  is a fixed capacitance that stores the same energy as  $C_{\text{oes}}$  while  $V_{\text{CE}}$  is rising from 0 to 80%  $V_{\text{CES}}$ .
- ⑥ Calculated continuous current based on maximum allowable junction temperature. Package current limit is 60A. Note that current limitations arising from heating of the device leads may occur with some lead mounting arrangements.

**IMPORTANT NOTICE**

Unless specifically designated for the automotive market, International Rectifier Corporation and its subsidiaries (IR) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or services without notice. Part numbers designated with the "AU" prefix follow automotive industry and / or customer specific requirements with regards to product discontinuance and process change notification. All products are sold subject to IR's terms and conditions of sale supplied at the time of order acknowledgment.

IR warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with IR's standard warranty. Testing and other quality control techniques are used to the extent IR deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

IR assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using IR components. To minimize the risks with customer products and applications, customers should provide adequate design and operating safeguards.

Reproduction of IR information in IR data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alterations is an unfair and deceptive business practice. IR is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of IR products or serviced with statements different from or beyond the parameters stated by IR for that product or service voids all express and any implied warranties for the associated IR product or service and is an unfair and deceptive business practice. IR is not responsible or liable for any such statements.

IR products are not designed, intended, or authorized for use as components in systems intended for surgical implant into the body, or in other applications intended to support or sustain life, or in any other application in which the failure of the IR product could create a situation where personal injury or death may occur. Should Buyer purchase or use IR products for any such unintended or unauthorized application, Buyer shall indemnify and hold International Rectifier and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that IR was negligent regarding the design or manufacture of the product.

IR products are neither designed nor intended for use in military/aerospace applications or environments unless the IR products are specifically designated by IR as military-grade or "enhanced plastic." Only products designated by IR as military-grade meet military specifications. Buyers acknowledge and agree that any such use of IR products which IR has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

IR products are neither designed nor intended for use in automotive applications or environments unless the specific IR products are designated by IR as compliant with ISO/TS 16949 requirements and bear a part number including the designation "AU". Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, IR will not be responsible for any failure to meet such requirements
